STATEWIDE TECHNICAL SERVICE PROVIDER for WRAPS

*Are sedimentation, pesticide and nutrient runoff degrading your watershed?
Then work with No-till on the Plains to provide producers the education and information
they need to drastically, positively affect your water quality!*

Instituting continuous no-till WILL effectively address these concerns.
The amount of soil detachment under continuous no-till systems will be nearly eliminated.
This positively impacts water quality, helping producers meet TMDL requirements and the
WRAPS goal of reducing pesticide and nutrient run-off and obviously sedimentation.

No-till on the Plains, Inc. general information:

- Formed in 1992, No-till on the Plains is a non-profit educational organization providing information on adopting **continuous** no-till which will enhance soil and water quality, economic potential and the quality of life.
- Our success has been chronicled by the earliest reports of no-till adoption across Kansas growing from 650,000 acres in 1992 to almost 4,250,000 acres in 2004 and by the growth of attendance at our events from a few hundred to over a few thousand, giving our regional organization credibility worldwide.

PROGRAMS/PRODUCTS AVAILABLE TO STATEWIDE WRAPS

- **Make the Connection:** This introduction to the principles of No-till on the Plains should appeal to producers of all methods of farming – whether they are just considering no-till or whether they have been no-tilling for 20 years. This 2-3 hour meeting will cover the concepts and practices of continuous no-till (this meeting does not include a meal.) Producers will learn first-hand of the benefits for utilizing complex rotations and their proper cropping intensity, integrating cover crops and nutrient and pest management. This is a great opportunity which leads up to the next step, a No-till Field Day – Whirlwind Expo at which we dive into these topics in much more detail.
Cost: \$2,750
- **Whirlwind Expo:** This Field Day is a top-to-bottom, A-Z understanding of no-till, beginning from water infiltration into the soil, a rainfall simulator presentation, soil structure/ demonstrations, nutrient/pest management, crop rotations including cover crops, machinery set-up and function. (This day-long event includes a meal.)
Cost: \$16,000

- **No-till Seasonal Meetings:** Examples...a Harvest-time Meeting will discuss residue management (setting machines, etc...) as well as in-depth herbicide and pesticide program and a follow-up on cover crops; a Planting Season Meeting will discuss proper set-up of planting equipment, crop rotation sequence, etc..
Cost: \$2,750
- **Scholarships for the yearly No-till on the Plains Winter Conference:** One of North America's premier conferences, this world renown event is a two-day meeting in Salina, Kansas featuring expert and producer speakers from around the world covering a broad range of topics.
Cost: \$150 x number of participants (Example: 10 producers x \$150 = \$1,500)
- **Audio recordings of Winter Conference sessions:** Available for multiple years, this set includes a Conference Proceedings Manual (while supplies last), an album of select audio CD's from the conference, and some corresponding PowerPoint presentations.
Cost: \$279.95 *Select individual audio recordings available for \$14.95 each.*
- **Back issues of the *Leading Edge* magazine:** Every issue is included on the CD version. While supplies last, paper copies of issues currently in stock will be distributed in addition to CD.
Cost: \$250 per package for back issues (approximately 20 issues plus CD)
 \$ 35 per current issue of the *Leading Edge* magazine
 \$ 5 per issue of older issues
- **No-till on the Plains Consultant:** Our Consultant will assist producers with assessing their equipment needs, preparatory work, setting up rotations, etc. The importance of utilizing a consultant with a thorough and complete understanding of continuous no-till is imperative to the success of the adoption.
Contact No-till on the Plains for more information.
- **No-till University:** Online courses designed to educate producers about the components of continuous no-till. Our desire is to have top-quality information at the fingertips of producers worldwide so continuous no-tillage (CNT) production will continue to expand and increase in quality. Producers must be able to easily locate information pertinent to their operations. We are building a fantastic online resource to accomplish this objective. Once in place, the general information will be available whenever it is needed by the public. Contact No-till on the Plains for more info.

Thank you for your consideration of our products.

We look forward to working with you and improving water quality for all!
